iCUERIOUS™

- **What all patents may be hyperlinked using iCueLink?**
  iCueLink hyperlinks patents from all jurisdictions provided they are inputted in the right format.

- **What's the publication number format we need to use while searching?**
  A patent publication number without having any space between the country code and patent number is the correct format. Additionally, the publication number format should be in compliance with the database to which it is hyperlinked.

- **Can we input U.S. patent number without country code?**
  Yes, by default, if a patent number is searched without kind codes and country code, then it would be hyperlinked to USPTO.

- **What database would the patent publication numbers be linked to?**
  U.S. Patents would be hyperlinked to USPTO, and others would be hyperlinked to EspaceNet
